CERTIFICATE OF APPRECIATION

I have great pleasure in introducing M/s. **CHENNAI CIVIL-TECH RESEARCH FOUNDATION** Pvt. Ltd. (CCTRF) located at Velacherry, Chennai. The organization is managed by highly qualified and experienced personnel in the field of Non-Destructive and Semi-Destructive tests, and evaluation. I have known Sri. H.G. Sreenath, Technical Director (formerly, Deputy Director at SERC, Taramani, Chennai) and Sri. A.V. Balachandra, for more than a decade.

I have entrusted a number of assignments of testing and evaluation of buildings, and I have found that they follow systematic and scientific approach for evaluation purposes, and provide diligent and fast service.

They have established an excellent laboratory at Velachery, and they are fully equipped to undertake tests on, constituent materials of concrete, building materials, such as, steel, bricks and tests on hardened concrete (Standard cubes, Cylinders, etc.). I am sure that this laboratory will be very useful for many mega projects coming up in and around Chennai. They are providing reliable, honest and good technical services at the laboratory, and at the site. In addition, they have expertise in providing Advisory and Consultancy services.

I wish them well in their efforts.

(Dr. A.R. Santhakumar)
